

K3 Enhancement Activities

K3 英語增潤活動

From K3 to P1 - English Enhancement Activities

Our course is designed to develop children's conversational English to enhance their fluency and confidence. This equips children with the essential skills and smoothen their transition from kindergarten to primary school.

The children will explore various themes throughout the course. Our native English teachers will guide them in the lessons and provide opportunities for them to practice and express themselves through discussions, real-life scenarios, presentations, games and role-plays.

Parents also play an essential role in children's learning. The course provides suggestions for parents to work with their child at home to further their English development.

Upon completion of the course, through the fun and carefully designed activities children will improve their vocabulary range, communication skills, critical reflection and interpersonal skills, all of which are essential for English success in the primary school setting.

English Enhancement Activities and English Funland Class complement each other. The Funland Class is an all-rounded programme, whereas Enhancement Activities focus on critical thinking and communication skills.

Themes include:

- * Food
- * Our Hong Kong
- * Superheroes
- * Under the Sea
- * Go Green
- * Toys
- * Seasons
- * Fairytales
- * Vacations
- * Dinosaurs
